PROFESSIONAL SUMMARY

Frontend Web Developer specializing in React and Next.js, focused on building responsive, performant, and user-centric web applications. Experienced in translating designs into clean, maintainable code and delivering real-world products from concept to deployment.

EDUCATION

Bachelor of Computing and Information Technology - Computer Science Department
Arab Academy for Science and Technology and Maritime Transport (AASTMT)

Expected Graduation: July 2026

GPA : 3.70 / 4.00

SELECTED PROJECTS

Daberha, Personal Finance Web App | live | Source Code

- Designed and developed a privacy-first, responsive frontend for tracking budgets and daily expenses without linking bank accounts.
- Built an interactive dashboard with dynamic charts to visualize spending insights and financial goals.
- Optimized UI performance using reusable React components and efficient state management.
- Ensured seamless user experience across devices with modern styling and accessible design.

Hossam Abdelmalek Portfolio | Freelance | live

- Designed and developed a typography-focused, minimalist frontend to showcase poems, literary excerpts, and published books.
- Built a content-driven UI optimized for readability and accessibility, putting written content at the center of the experience.
- Integrated a Headless CMS to enable non-technical content management and seamless publishing of new works.
- Delivered a responsive, performant interface with a clean layout that scales smoothly across devices.

GetBox, Link Download Utility | Source Code

- Built a user-focused frontend tool enabling direct content downloads from provided links.
- Designed a clean, form-driven interface to minimize friction and guide users through the process.
- Implemented clear feedback states and user flows for better usability.
- Ensured responsive layout and reusable components for scalability.

TECHNICAL SKILLS

Programming Languages

- JavaScript (ES6+), TypeScript, HTML5, CSS3.

Frontend Frameworks & Libraries

- React, Next.js.

Software Engineering Concepts

- Component-Based Architecture, State Management, Separation of Concerns, Performance Optimization, Clean Code Principles.

UI / UX & Styling

- Responsive Web Design, Tailwind CSS, shadcn/ui

Web & API Integration

- RESTful APIs, Client-Side Data Fetching, Authentication Flows (JWT).

Tools & Platforms

- Git, GitHub, Vercel, Netlify, Browser DevTools.

CERTIFICATIONS

- React.js Certificate – ITI / Mahara-Tech - (Preview)
- Sprints × Microsoft Summer Camp – Web Development (40 hrs) - (Preview)
- Full Stack Web Development using PHP (120 hrs) – ITI - (Preview)
- Full Stack Web Development -full stack open - (In Progress)
